# Atturra ePlanning Integration

## Connecting NSW councils to the NSW Planning Portal

A dedicated integration solution that's seamless, scalable and compliant.

## What is Atturra ePlanning Integration

Atturra's ePlanning Integration communicates with the NSW Planning Portal via the secure APIs which DPIE has made available to councils and integrates with TechnologyOne, Civica and Infor Pathway ERP solutions to provide updates on the Development Application(DA) process.

Traditionally submitted to the applicant's local council with standard application forms, supporting technical reports and plans; the process of submitting a DA can now be fully automated, with applicants able to submit digital assets via the NSW Planning Portal.

### Get in touch

Write to us at
**nsw.eplanning@atturra.com**
and an expert will get in touch with you.

## How it works

Atturra has collaborated with vendors to **interface directly into the council ERP systems** and to facilitate the required workflows between council and NSW Planning Portal to take applications **from pre-lodgement through to determination**.

Using a detailed event handling and notification framework to ensure delivery of bi-directional communications and alerting on any outages, the atturra ePlanning Platform ensures that both applicants and councils are able to **streamline the Development Applications process** and turn around applications with increased accuracy and speed.

### The Atturra ePlanning Integration advantage

Delivered as a
**managed service**

**Scalable** for LGAs of
all sizes

Can be deployed either
on-prem or **on cloud**

Built on award-winning
**Boomi platform**

Our team constantly updates the integration in step with the NSW Planning Portal and the ERP vendor development schedules.

> *"Our collaborative solution with Atturra for ePlanning is a key initiative for the (Albury) Council to grow its online lodgement capability. The solution has simplified and streamlined the development application process for our community, improving productivity and enabling the Council to deliver high-quality customer experiences. This is a big win for us."*
