

Automation as a Service

Optimise your IT operations

atturra

We'll lead you there

Automation provides IT relief from manual, repetitive tasks

With the urgent need for digital transformation, organisations are turning to their IT departments for agile, rapid IT services with predictable outcomes and costs.

Atturra's Automation as a Service (AaaS), underpinned by Red Hat's Ansible Platform, offers much-needed relief. It makes deploying and maintaining technologies more manageable by sharing workflows and playbook tasks.

atturra

Atturra automation platform

atturra

Automation provides resources to cloud platforms like Atturra, AWS, Azure and Google Cloud, allowing you to write playbook tasks to work across all providers.

Five reasons why you should deploy Automation as a Service

Automation provides significant Return on Investment (ROI) in financial, technological, and operational aspects, making it an appealing choice for organisations.

Atturra's AaaS offers a consistent, cost-effective, and easy-to-learn experience that delivers value to many teams.

It is not just about the technology but also enables collaboration between technical and development teams, such as:

- Sharing playbooks (tasks) by cloning repetitive tasks and automating your environments (e.g. snapshots, backups, unused cloud resources etc).

- Being proactive and integrating workflows further to establish consistent audit trails.

- Providing frameworks for sharing best practices, helping to make your teams feel more connected.

01

Increased Efficiency

Automation speeds up tasks and reduces manual effort, leading to faster and more efficient processes.

02

Cost Reduction

Automating repetitive tasks lowers labour costs and reduces expenses associated with human error.

03

Improved Accuracy

Automated systems minimise the risk of errors, ensuring consistent and reliable outcomes.

04

Scalability

Automation allows for easy scaling of operations, enabling businesses to grow without a corresponding increase in resources.

05

24/7 Operation

Automation enables continuous operation, boosting productivity and providing uninterrupted service.

Pricing models to suit your business requirements

Atturra offers three service tiers: Bronze, Silver, and Gold*, each designed to meet your specific business needs.

Description	Bronze	Silver	Gold
Ansible Automation Platform	✓	✓	✓
Atturra Service Desk – Self Service Portal	✓	✓	✓
Atturra Service Desk – Requests & Incidents	5 x 8 hr/day	5 x 8 hr/day	24 x 7 hr/day
AAP Operated & Monitored by Atturra	✓	✓	✓
Atturra – Performance Optimisation and Recommendation Reporting		✓	✓
Service Level Objectives & Metrics	5 x 8 hr/day	5 x 8 hr/day	24 x 7 hr/day
Service Delivery Management		Automation logs only	Logs + Monthly SDM Report
Additional Professional Services	Base Rate	-5%	-10%
Dedicated Instance			✓

An automation service can help reduce costs and offer more advantages than other automation tools.

*Our service offerings can be managed directly by your IT dept or Atturra NOC.

How is AaaS deployed?

An easy to deliver automation service

1

5
Handover
and Closure

Atturra requires an initial deployment project to establish the service and smooth the transfer of knowledge and responsibility from Atturra to your IT team. The scope of this transition varies depending on your selected service tier.

Experience automation first-hand with Atturra

If you are self-serving or running a service with Atturra, the user-friendly automation dashboard makes it easy to monitor tasks and workflows in your environments.

Many cloud solutions, such as Atturra, Microsoft Azure, AWS, and Google, are suitable for engaging your automation service, making your business operations seamless and without disruptions.

To explore the advantages of AaaS, book a demo with Atturra today.
